Recruiting and Qualifying Method - Standard Operating Procedure:

Paradigm Technology has access to technical resources with the skills required to meet most specialized technical needs. We typically produce a qualified candidate within 24-48 hours or less. We realize that timeliness, quality, and accuracy are some of the most important attributes that clients depend upon when calling a consulting firm.

Paradigm's Technical Recruiters perform the following screening process for candidates: we fully screen and conduct face-to-face interviews (depending on special deadlines and/or geographic restraints). We verify professional references, employment. certifications, and we will complete detailed drug and background checks when requested.
